

# Connect WhatsApp cloud Api to **WhatsCloud** Platform.

1. **Sign up** or **log in** to the [WhatsCloud Platform](#) and navigate to the **My CloudApis** Section.

2. Click on the **Create CloudApi** button to initiate the creation process.
3. Fill in the required details, including your WhatsApp number (which is already connected to the WhatsApp Cloud API), a WhatsApp username (can be any desired username), **WA Phone number ID**, **WA Business ID**, **Meta App ID**, and **WA Access Token**. Then, click on the "**Create Now**" button.

The screenshot shows the 'Add CloudApi' form within the WhatsCloud platform. The breadcrumb trail is / user / cloudapi / create. A 'Back' button is in the top right. The form contains the following fields: 'WhatsApp Phone Number' (placeholder: 'Your WhatsApp Number'), 'WhatsApp User Name' (placeholder: 'It can be anything.....'), 'WA Phone Number ID' (placeholder: '109058942226782'), 'WA Business ID' (placeholder: '109058942226782'), 'Meta Application ID' (placeholder: '109058942226782'), and 'WA Access Token' (placeholder: 'EAALXhdrLgPABABttsp9TkYZ.....'). A 'Create Now' button is located at the bottom of the form.

Ops! Server Disconnected

5. Access **your WhatsApp Business account** in the Meta Developer Portal. Locate the "Menu" section and click on it to access the **configuration settings**.

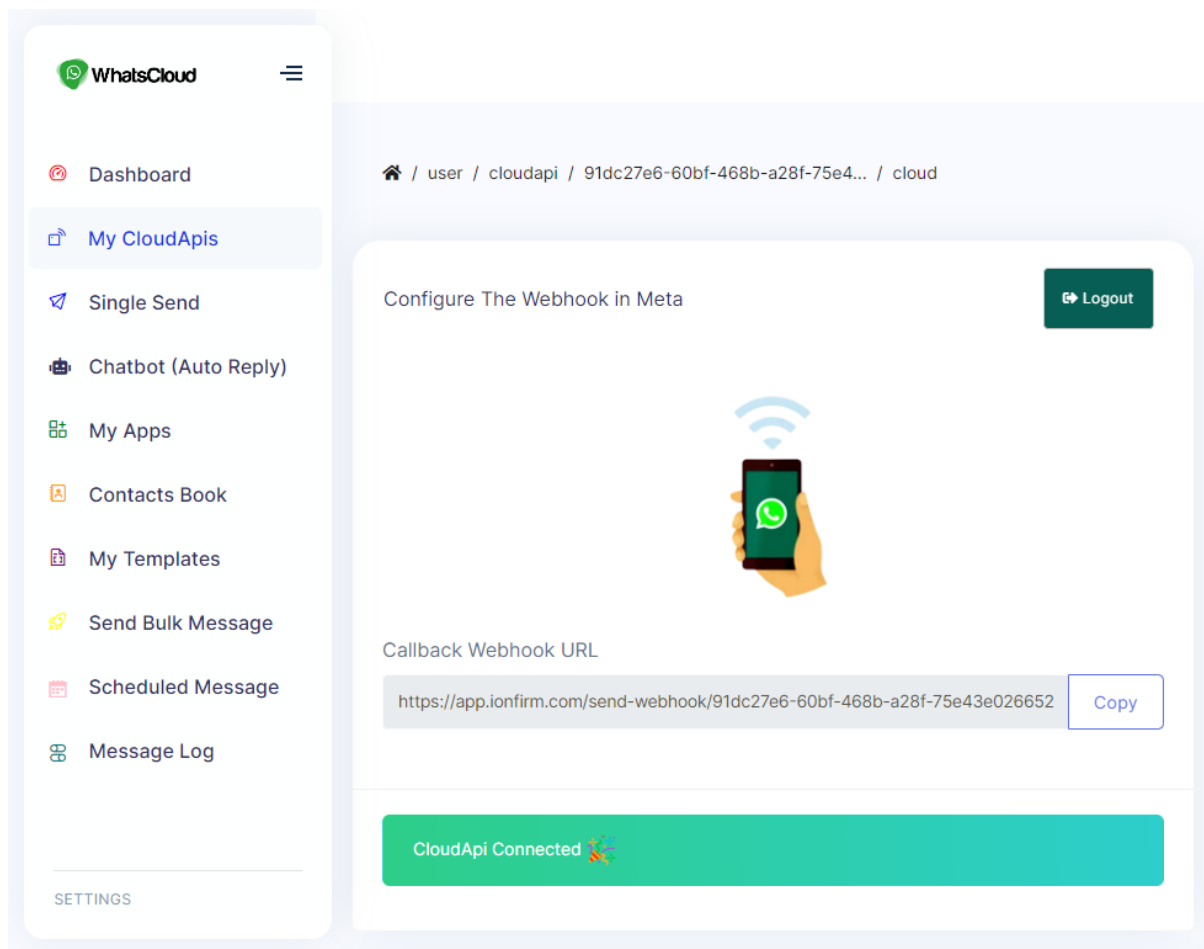

6. In the configuration settings, locate the Callback URL and Verify Token section.

7. Click on the "Edit" button and enter the webhook URL and Verify Token obtained from the **WhatsCloud** platform after creating the **CloudApi**.

8. Once the verification is successfully completed, go to the "Manage" option in your WhatsApp Business account and subscribe to the "Message" event at the minimum.

9. After completing the verification process, return to the WhatsCloud Platform. You will receive a confirmation message indicating that **the CloudApi has been connected successfully**.

10. **Congratulations!** You are now ready to send and receive messages using the WhatsApp Cloud API through the **WhatsCloud platform**.

By following these steps, you can seamlessly integrate the WhatsApp Cloud API with the WhatsCloud platform, allowing you to leverage the power of WhatsApp for effective communication and engagement with your audience.
